Mechanical

GG Tecknowave company Ltd offers advanced Mechanical Engineering services to customers that help them in developing complex mechanical designs and products, significantly reduce their time-to-market and help them penetrate early and deep into the existing and emerging markets.

The company can provide solutions throughout the product development life cycle from conceptual design, industrial and mechanical engineering design, CAD modelling and detailing, to simulation, analysis and prototyping, product testing, and manufacturing. This makes GG Techno wave Ltd a unique one-stop solutions provider for Engineering Services. The company also has expertise in implementation, maintenance, and customization of PDM and PLM tools.

The company's investment in specialist capability in CAD/CAE and the evolution of mechanical engineering practice as part of the Product Engineering Service triad stand as testimony to the capability to augment service lines. We have a proven track record of providing complete Mechanical Engineering solutions for customers in verticals like Aerospace, Automotive, Telecom, Consumer & Medical Devices, Semiconductor, and Storage & Computing.
